

BOX MODEL

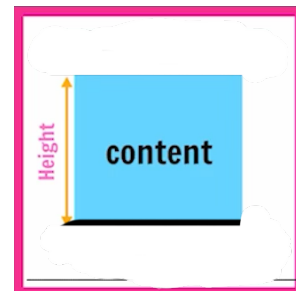

①

HEIGHT

By default , it sets content area height of the element

```
div {  
  height : 100px ;  
}
```

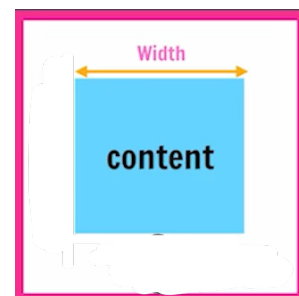

②

WIDTH

By default , it sets content area width of the element

```
div {  
  width : 100px ;  
}
```

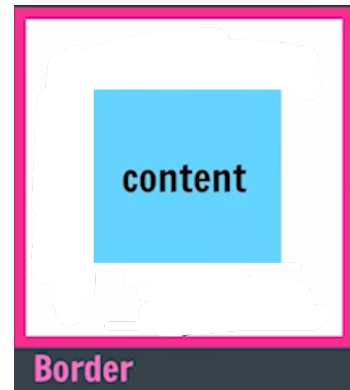

3

BORDER

– used to set an element's border

- border – width
- border – style
- border – color

BORDER SHORTHAND

→ width | style | color

eg:

```
div {  
    border : 2px solid red ;  
}
```

4

BORDER SIDES

– to control an individual side of the box

- border – left
- border – right
- border – top
- border – bottom

eg:

```
div {  
    border – left – style : dash ;  
}
```

* border shorthand also applicable.

```
div {  
    border-top : 2px solid red ;  
}
```

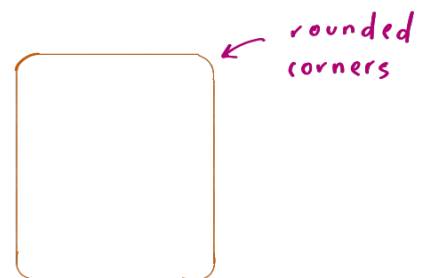

5

BORDER RADIUS

- Used to round the corners of an element's outer border edge

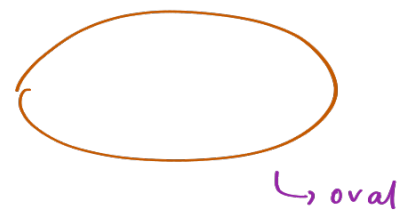

```
div {  
    border-radius : 15px ;  
}
```

→

```
div {  
    border-radius : 50px ;  
}
```

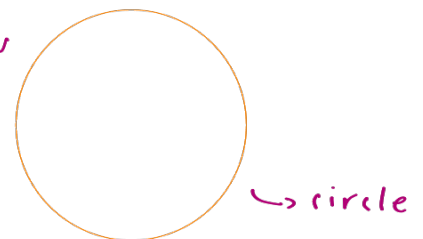

→

```
div {  
    height : 500px ;  
    width : 500px ;  
    border-radius : 50px ;  
}
```

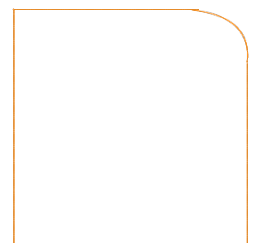

} same
h and w

→

```
div {  
    border-top-right-radius : 50px ;  
}
```

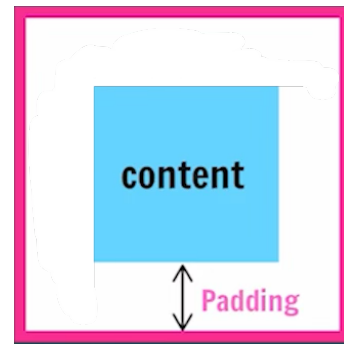

→

6

PADDING

- padding - left
- padding - right
- padding - top
- padding - bottom

PADDING SHORTHAND

1. For all sides

padding : 50px ;

2. top & bottom | left & right

padding : 1px 2px ;

3. top | left & right | bottom

padding : 1px 2px 3px ;

* Clockwise

4. top | right | bottom | left

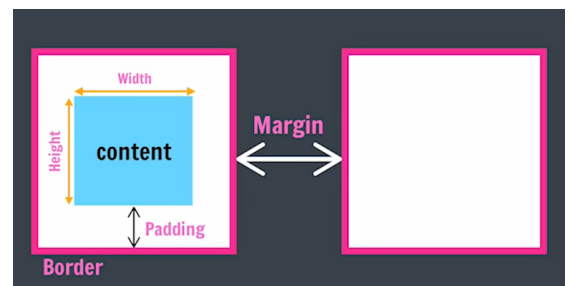

padding : 1px 2px 3px 4px ;

7

MARGIN

- To set space outside of the border

- margin - left
- margin - right
- margin - top
- margin - bottom

MARGIN SHORTHAND

1. For all sides `margin : 50px ;`

2. top & bottom | left & right `margin : 1px 2px ;`

3. top | left & right | bottom `margin : 1px 2px 3px ;`

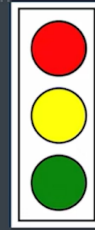

* Clockwise

4. top | right | bottom | left `margin : 1px 2px 3px 4px ;`

Practice Qs

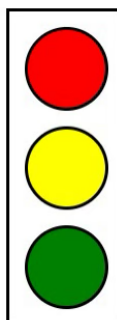

Recreate the following elements using given css:

- Create a div & 3 sibling divs inside it
- For the outer div set following styling
height 200px, width 70px and border as 2px solid black color
- For the ^{inner} ~~outer~~ divs set following styling
height 50px, width 50px and border as 2px solid black color
also set a margin of 10px
make inner divs circular in shape & given them individual colors (red, yellow & green)

HTML

```
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title> Traffic Lights </title>
  <link rel="stylesheet" href="1_Q_Traffic_lights.css">
</head>
<body>
  <div id="traffic">
    <div class="li" id="red"></div>
    <div class="li" id="yellow"></div>
    <div class="li" id="green"></div>
  </div>
</body>
</html>
```

CSS

```

#traffic{
  height: 200px;
  width: 70px;
  border: 2px solid black;
}

.li{
  height: 50px;
  width: 50px;
  border-radius: 50%;
  margin: 10px;
  border: 2px solid black;
}

#red{
  background-color: red;
}

#yellow{
  background-color: yellow;
}

#green{
  background-color: green;
}
```

DISPLAY

- It sets whether an element is treated as a block or inline element and the layout used for its children

`display : inline`

`display : block`

- * could make an inline element act as a block and vice versa

Block & Inline

Conclusions

BLOCK	INLINE
Always start on a new line	Do not start on a new line
Take up as much horizontal space as possible (the full width of the container or browser window if there is no container)	Only use as much horizontal space as required by the content. Do not accept width and height CSS properties
Will respect width and height CSS properties	Margins will work horizontally, but not vertically
Horizontal and vertical margins both work	Padding works on all sides, but the top and bottom may overlap other elements.

INLINE - BLOCK

- Elements : style set $\rightarrow$ block
behavior $\rightarrow$ Inline (single line)

display : inline - block

Note :

display : none $\rightarrow$ hides the element
